

# Dual-Notice Pesticides Registered for Use in Wisconsin

October 2009

☞ DO NOT USE THIS TABLE AS A SUBSTITUTE FOR READING THE PESTICIDE LABEL. The information in this table may not be complete and is intended for reference only.

☞ For some active ingredients listed here, there may be formulations which are not dual-notice pesticides.

☞ Don't automatically assume that a dual-notice pesticide is also classified as a restricted-use pesticide, or vice versa.

A dual-notice pesticide is a pesticide whose label, in an Agricultural Use Requirements box, requires the agricultural employer (i.e., farmer) to notify non-family agricultural workers both orally and by posting that a site has been treated with the pesticide. Wis. Adm. Code Chapter ATCP 29 (Pesticide Use and Control) further requires that the applicator post any site treated with a dual-notice pesticide if that site borders within 300 feet of a nonagricultural area where persons are likely to be present (e.g., residence, school) during the application and/or the restricted-entry interval specified on the pesticide label.

References to pesticide products are for your convenience and are not an endorsement or criticism of one product over other similar products.

Active Ingredient(s)	Sample Trade Name(s)	Active Ingredient(s)	Sample Trade Name(s)
<b><i>Insecticides / Miticides / Nematicides</i></b>			
azinphos methyl	Azinphosmethyl, Guthion Solupak	methomyl	Lannate (grapes only)
bifenthrin	Capture 1.15G, Empower 2 (REIs of 7 days or more)	methyl parathion	Cheminova Methyl, Penncap M
chlorpyrifos	Chlorpyrifos, Cobalt, Lorsban, Warhawk	phorate	Thimet, Phorate
disulfoton	Di-Syston	propargite	Comite, Omite
ethoprop	Mocap	terbufos	Counter
methamidophos	Monitor		
<b><i>Fungicides</i></b>			
dodine	Syllit	triphenyltin hydroxide	Agri Tin, Super Tin
<b><i>Herbicides / Desiccants / Plant Growth Regulators</i></b>			
ethephon	Cerone, Ethephon, Florel		
<b><i>Fumigants</i> (see ATCP 30 to apply metam sodium and chloropicrin)</b>			
chloropicrin	Chlor-o-Pic, Pic-Plus	methyl bromide	Metabrom, Meth-o-Gas
dazomet	Basamid G	methyl bromide/chloropicrin	Bro-Mean C-33, MBC-33, Terr-o-Gas 98, Tri-Con
dichloropropene	Telone II	sodium N-methyldithiocarbamate (metam sodium)	Metam CLR, Sectagon, Vapam
dichloropropene/chloropicrin	Pic-Clor, Telone C-17, Telone C-35	potassium N-methyldithiocarbamate (metam potassium)	Metam CLR, Sectagon, Vapam
iodomethane/chloropicrin	Midas
