Registration

Registration for the CCA Training Session is on a first-come, first served basis. Space and materials may be limited. The registration fee is \$150/person and covers the cost of instruction, lunches, handouts, and costs associated with this course. Do not attend this meeting without receiving confirmation of your registration.

Send check, payable to WFCA, to:

Bryan Jensen
Dept. of Entomology
1630 Linden Dr.
Madison, WI 53706

Registration Deadline

Registrations received by November 30, 2007 are appreciated. Because course materials must be prepared in advanced, late registrations may not receive a complete set of the training materials at the start of the conference.

Cancellations\Refunds

You must notify us of cancellations by November 30, 2007 to receive a full refund. Refunds after that date will not be guaranteed.

Objectives

The training session is designed to help participants understand the principles necessary to become a quality crop advisor. It is NOT a crash course designed to cover specific information necessary to pass the exam. However, it will cover more general information and will assist students by giving better direction for independent study.

Location

The CCA Training Session will be held at the Crowne Plaza Hotel, 4402 East Washington Ave., Madison, WI 53704. The hotel is located approximately ½ mile west of the intersection of Washington Ave. (also Hwy. 151) and Hwys. 90 & 94. Use exit #135A if traveling on Hwys 90 & 94.

Lodging

Lodging is the responsibility of the participants.

A block of guest rooms has been reserved for the CCA Training Session. To take advantage of this reduced rate you must make reservations by November 23, 2007. Please identify yourself as being with the CCA Training Program. Reservations for the Crowne Plaza can be made by calling 608-244-4703.

Free Web-Based Training

This online course is available free of charge to anyone registered for the CCA Pre-Test Training Program. Our goal for this web-based training program is to provide baseline crop and pest management information that some individuals (depending on background and experience) may find useful prior to attending the classroom training session on December 13-14. It is not intended to duplicate the classroom training. To use this online training program “Basics of Crop Production” you must supply your email address with your registration.

Upon receipt of your registration materials, a username, password and login link will be electronically generated and sent to you by email. Online help is available and written instruction will be included with your letter of confirmation.
