

Manure Load Weight Worksheet

Farm Name/Producer

Manure Analysis (optional):

Calibration Date

Analysis Date:

Manure Source/Type

Sample ID:

Spreader Name/Load Size (manufacturer's estimate)

FULL

Left wheel

Right wheel

Rear tractor axle

+

+

Front spreader axle

+

+

Rear spreader axle

+

=

Full total

 lb

EMPTY

Left wheel

Right wheel

Rear tractor axle

+

+

Front spreader axle

+

+

Rear spreader axle

+

=

Empty total

 lb

To calculate Manure weight subtract Empty total from Full total
(Full total - Empty total = Manure weight)

Manure weight = lb

 2,000

To calculate Tons per Load divide Manure weight by 2000
(Manure weight ÷ 2000 = Tons of Manure per Load)

Tons of manure per load =
