Post ATCP 29 sign immediately before application and throughout REI AND
Post School OR Landscape sign immediately before application and for 72 hours after.

No

Landscape

Post Landscape sign immediately before application and for 72 hours after.

Yes

School/Landscape

Post School OR Landscape sign immediately before application and for 72 hours after.

Yes

Post ATCP 29 sign immediately before application and throughout REI AND
Post Landscape sign immediately before application and for 72 hours after.

No

Post ATCP 29 sign immediately before application and throughout REI AND
Post School OR Landscape sign immediately before application and for 72 hours after.

Landscapes include turf, ornamental, or mulched areas, or areas being prepared as such, UNLESS such areas are within 10 feet of a building and are included in a barrier treatment that is made to prevent structural pests from invading the building. Cracks in sidewalks and driveways are NOT within a landscape.

Restricted-entry interval: the time (in hours) after a pesticide application ends during which entry into the treated area is restricted according to label directions.

If a pesticide application is made on school forests for the production of forest products, additional posting may be required by the Worker Protection Standard (WPS) and the product label.

Rev. September 2005

The different warning signs are depicted on the flip side of this handout.
