Wisconsin Commercial Pesticide Applicator:

Turf & Landscape

Authors

Steve Tomasko, Extension Outreach Specialist, Pesticide Applicator Training Program, University of Wisconsin

Glenn Nice, Extension Program Manager, Pesticide Applicator Training Program, University of Wisconsin

PJ Liesch, Turfgrass and Ornamental Entomologist, University of Wisconsin

Paul Koch, Associate Professor Turfgrass, University of Wisconsin.

Commercial Category 3
5,951 Certified Applicators

Examples of Applicators

- Custom applicators treating sod
- Lawn care professionals
- Arborists
- Landscape and interiorscape contractors
- Golf course or cemetery contractors
- Sod producers
- Public/private researchers
- Park/campground employees
- Custodians/groundskeepers (including interiorscapes)
- Public school employees treating turf/athletic fields on school property

Examples of Applications

- Production/establishment/maintenance of sod and turf (including whole-lawn flea treatments)
- Prepare ag land for planting to/taking out of sod
- Prepare land for planting turf or landscape plants
• Establishment/maintenance of landscape plants including interiorscapes
• Treating home fruit trees for ornamental quality (Option Category 1.2; GO TO Category 1.2 if treating for fruit quality/sale)
• Residential/commercial prairie/grassland (Option Category 1.1 if undeveloped land; GO TO Category 1.1 or 2 if wild land)
• Non-forested parts of campgrounds, parks
• Trails through turf/ornamental areas (Option Category 6)
• Selective or nonselective weed control in any landscape (including fence lines) more than 10 feet from a structure
• Nonselective weed control within 10 feet of a structure to remove habitat for structural pests (option Category 7.1)
• Nonselective weed control in right-of-way sites that do not cross property lines (e.g., substations, parking lots, sidewalks, driveways), or to prepare ground at such sites for blacktop or sidewalks, or selective or nonselective control in median strips (Option Category 6)
• Spot or directed application within a landscape to control structural, household, or nuisance pests (e.g., ant colonies; bees/wasps nests; carpenter ants in sites such as woodpiles, retaining walls, and stumps) (Option Category 7.1)
• Spot or directed application in parking lots, sidewalks, driveways, and similar non-landscape areas to control structural, household, or nuisance pests (Option Category 7.1)
• Control vertebrates in turf or landscapes (GO TO Category 7.1 for interiorscapes)

Training Manual
Table of Contents

Concise Study Plan (yellow insert)  • How to Pass the Certification Exam  • 30 Day study calendar

Section I: Pests  • Insects and Their Relatives  • Weeds  • Plant Diseases  • Mammals

Section II: About Pesticides  • Pesticides  • Formulations

Section III: Pesticides and the Law  • Pesticide Regulations  • The Pesticide Label
## Section IV: Health Precautions
- Pesticide Risks to People
- Protecting Yourself
- Responding to a Pesticide Exposure and Heat Stress

## Section V: Handling Pesticides
- Transporting Pesticides
- Storing Pesticides
- Mixing and Loading
- Managing Pesticide Wastes

## Section VI: Pesticide Emergencies
- Emergency Planning, Spills and Fires

## Section VII: Applying Pesticides
- Safety Concerns
- Application Equipment
- Calibration

## Section VIII: Keeping Pesticides on Target
- Pesticides in the Environment
- Overspray and Drift
- Pesticides and Water
- Nontarget Organisms
- Pesticide Resistance

## Appendices
A. Information Sources and Contacts
B. Pesticide Laws and Rules
C. Sample Label
D. How to Understand Material Safety Data Sheets
E. Tips on Taking the Certification Exam
F. Principles of Pest Management
G. Insect Management
H. Weed Management
I. Disease Management
J. Supplemental Transportation Regulation Information
K. Calibration Guide

## Glossary
