Wisconsin Commercial Pesticide Applicator:
Mixer & Loader

Authors
Steve Tomasko, Extension Outreach Specialist, Pesticide Applicator Training Program, University of Wisconsin
Roger Flashinski, Extension Program Manager, Pesticide Applicator Training Program, University of Wisconsin
Chris Boerboom, Extension Weed Scientist, University of Wisconsin

Commercial Category 24
52 Certified Applicators

Examples of Applicators
• Individuals mixing or loading, but not applying, pesticides

Examples of Applications
• Mixing/loading pesticides into application equipment or nurse vehicles in any category or subcategory
• No certification requirements for loading or transferring unopened containers nor for a truck driver who only unloads bulk pesticide into storage facilities and not into application equipment or nurse vehicles

NOTE: Because you will not be applying pesticides, you do not need to study the entire manual. Those portions which are covered on the certification exam are listed in the table of contents below.

Also, a person certified in the mixer/loader category can mix or load pesticides in ANY category or subcategory. However, because the knowledge expectations are the same for all mixer/loaders, the training must be consistent. The Field and Vegetable Crops manual was chosen, therefore, because most mixer/loaders work in this category.
